Hackathon Kick-Off

About the Hackathon

Create Predictive Markets

Build scalable blockchain solutions tackling real-world challenges

Open to coders, designers, analysts, and first-time hackers

The challenge

Create a Create Predictive Markets blockchain solution

WHY Blockchain?

Why should you build on BlockDAG?

Scalability: Supports parallel block creation, leading to higher transaction throughput.

Security: Uses robust consensus mechanisms to ensure network integrity.

Decentralization: Maintains a trustless environment with a distributed ledger.

Low Latency: Fast transaction confirmation times compared to traditional blockchains.

Smart Contracts: Compatible with Solidity-based contracts.

Fuel Your Build with BlockDAG Tools

We already have set of tools
you can use

IDE

Explorer

Contract Wizard

Faucet

Academy

Where to learn Blockchain?

https://academy.blockdag.network/

Example Projects?

Reflection User Guide

https://docs.blockdagnetwork.io/blockdag-dapps/reflection-user-guide

Lottery User Guide

https://docs.blockdagnetwork.io/blockdag-dapps/lottery-user-guide

Bonus Opportunity

Projects integrating BlockDAG tech may qualify for exclusive grant program

Turn your hackathon project into a real-world startup

Community

Join our discord community & ask questions!

Judging Criteria

Technical skill & scalability

Clear, compelling blockchain use case

Creative use of BlockDAG tools/features

Submission Guidelines

Live on BlockDAG Testnet

Core Feature Demo & Video Tutorial

Concise Product Description
